Subject: RE: City of Albuquerque 2016 PM10 exceedances at S Valley - AQS concurrence flags

Attachments: AMP360_1637811.pdf

Good afternoon,

It appears that some of the hours for PM10 at the South Valley site (AQS# 35-001-0029-81102-3) were not completely flagged for exceptional events on March 29, 2016 and May 6, 2016. Therefore we have been unable to enter EPA concurrence flags for all hours of these days. Please see the attached AMP360. Missing hours for March 29, 2016 start at the bottom of pg. 5 and May 6, 2016 start on pg. 14.

Please complete the exceptional events flagging (event description and applicable NAAQS standard). Once we are notified this is complete we will enter our flags.

Thanks, Trisha Curran (6MM-AM) (214) 665-8345 (Office)

Dwayne and Dan,

We are still discussing internally and will let you know if any changes need to be made. Thanks!

Dwayne and Dan, Remember back in June 2017, when we struggled to get the May 7 2014 EE concurrence flags in AQS? We may be revisiting whatever happened back then. Trish was not able to enter the concurrence flags for all the hourly measurements on March 29, 2016, and May 6, 2016. Looks like the March 22, 2016, hourly flags got entered. Trish can tell you more about what she experienced in AQS. We may need your help to resolve this matter. Thanks

Below are clips from AQS report run after Trish efforts. Capital RJ means EPA concurrence flag is in AQS. Lower rj means EPA concurrence flag not yet in AQS.
